A method for improving shopper navigation in a store by assisting in locating specific areas
of said store in a time efficient manner, comprising:

providing a hand carried apparatus imprinted with a graphical image of the layout of the store, said graphical image further providing detailed information related to the location of specific products within said store, and:

providing in at least one area of said graphical image a physical reference point within said store such that said graphical image may be used by a shopper to determine where one of said specific products is located.

- The graphical image of Claim 1 further providing the location of a plurality of facilities within the store including, but not limited to, safety facilities, restrooms, customer service counter and checkout area.
- The graphical image of Claim 1 wherein an area is provided for annotating said graphical image with shopper entered data, said area being comprised of guidelines.
- 4. An apparatus for improving shopper navigation in a store by assisting in locating specific areas of said store in a time efficient manner, comprising:
- a plurality of pages, each page having four edges, a front surface and a rear surface, said pages joined at one of said edges to form a portable tablet;

the front surface of said pages having imprinted upon it a graphical image representing the layout of a store:

- said graphical image further comprising at least one physical reference point, such that a shopper in said store is able to determine a specific location within said store and navigate to said specific location in a minimum of time.
- 5. The apparatus of Claim 4 wherein the reverse surface of the pages is further comprised of an imprinted image, said imprinted image being one or more of data, advertisement or information.
- The front surface of the page of Claim 4 further comprising an area for shopper annotation, said area being comprised of a plurality of guidelines.
